

## **An interview with a 17-years-old child (19/10/2020)**

- 01 Maybe. I've got lots of things to do. Going to school till late in the afternoon, doing homework, and so on. And after that I'm playing soccer and we have soccer practice three times a week. And one or two soccer games at the weekend. Maybe I find some time now and then for working for the community in my free time. But it must be fun and I want to meet my friends. If none of my friends participates, I won't participate either.
- 02 Yes, there are a few games for my PlayStation I like very much, but nothing special at the moment. I am using Tik Tok and Instagram from time to time. I don't post that much online but I like to stay in touch with my friends. Best I like are some cool videos from my friends in Tik Tok.
- 03 No, I don't read that much. Mostly I play games or watch Netflix in my rare free time. But most of the time I am with my friends.
- 04 To see my friends. And there are some interesting lessons, like sports and history, but most of the time it is boring at school.
- 05 I play soccer in a soccer team. This consumes most of my free time. We practice three times a week and at the weekends we have one or sometimes two games. There isn't much time left as free time. The rest of this time I try to meet with my friends or I watch some stuff on Netflix or play a game on my PlayStation.
- 06 No, not really. I used to when I was a kid, but now, I don't have the ease to focus on a book.
- 07 Yes, of course. I need it for school, for chatting with my friends, listen to some music or watch Netflix. I need it to play a multiplayer game like FIFA, too. So I use it pretty much often.
- 08 No, I don't have fear to talk to older children. Main thing is that they are cool and I find them likable.
