

**19/10/2020 GEORGIA BROWN INTERVIEW RESPONSES****A: EDUCATOR**

- 01 Singing and heavy use of names are good ways to capture and maintain the kids' attentions.
- 02 Reciprocation is key. If you do it, they will follow.
- 03 The Internet is so vast and limitless, the kids' not knowing how to navigate it is concerning, and she worries that the kids may wind up on a webpage they really should not be on, whether it is accidental or on-purpose. Parental supervision is an absolute necessity in this age group. She recommends "Safe YouTube," an app that displays a YouTube video without any extraneous information such as recommended or featured videos.
- 04 --
- 05 Seesaw educational app is great for its mobility and virtual learning features. Google Classroom is also effective. Mobile/smartphone apps are superior to webpages.
- 06 --
- 07 Basic communications features may be advisable such as chats and forums. Again, parental supervision is paramount. She also expressed a frustration that having to use many different apps often becomes confusing, and she thus would like to see an app that puts everything in one place: assignments at school, as well as communications between students and teachers. Perhaps this app would be made available to students within a schooling system or those approved through a process.
- 08 Yes!
- 09 Parents, again, play an important role in the children's understanding of the world and this includes education. Parents should be there for kids who may have trouble reading to make sure they understand what is written. Videos are secondary.
- 10 Some, as demonstrated in the interview with the kids, are very interested in initiatives such as this.

**NOTES:**

- There needs to be language accessibility/translation features
- Government funding/endorsement would be very comforting

## B: CHILDREN

- 01 --
- 02 Mario Cart  
YouTube  
Roblox  
Pokemon  
Minecraft  
Justice League  
Overwatch
- 03 Halloween: Pete the Cat  
Micky Mouse  
Encyclopedia of Very Important Things  
Cat in the Hat  
Elmo  
Are You My Mother?  
Croc Takes the Cake
- 04 Playing  
Coloring  
Singing  
Playing with Play-Doh  
Math  
Tests
- 05 Riding a bike  
Playing with sand and water  
Riding a scooter  
Swimming  
Playing pretend  
Watching movies  
Reading  
Going to the beach  
Geocaching  
Playing with trains

## NOTES:

- One student asked, "how is this going to help?" when presented with these questions
- Oftentimes, students asked if this app would allow them to play a game
