Help Center:

I don't like the gray background behind the text.

General Feedback:

Gray background behind the text doesn't look good, a data saving option might be useful, since you implemented gifs

General terms and conditions:

Underlined subsection titles do not look good, also grey background

Welcome page:

Page looks like 90ies webpage, scrolling function is not intuitive at all, a lot of space is wasted, especially between the sections, banner is way too big for an app, you really need to be more efficient with the allotted space,

Profile page:

Profile page does not fit the color scheme at all (actually, there is no color scheme).

Groups:

Munich Forestry Club: Spelling mistake in text near the bell (Munich, not Munic), everything between pink banner and Feed should go in the About page, which should be accessible over the settings button, I don't like the dropdown menu – instead you could implement a sidebar, that opens when I click on the group name in the banner (sidebar could contain the entries of the dropdown menu, as well as settings and about section). Also, you could put the sentence describing the group („A group of dendrophiles, ...“) both in the about section of the sidebar and above every other point in the sidebar (from top to bottom: „A group of ...“, Feed, Calendar, Members, Media, About, Settings).

Settings:

Chat settings: since the app is for children, allowing everyone to contact you is not a smart idea.
Spelling mistake: private instead of privat in Blocked section

Notification settings: I would like to have the option to disable every type of notification for a certain amount of time, also, I would like to enable notifications via email for every type of notification

FAQs: I would like to see the questions as a list and by clicking on one of the questions, the answer appears below the question. Another click on the question should make the answer disappear.
